Your Health is Our Priority

In an effort to help facilitate an increased quality of life for you our valued customer, we have provided this simple reference guide for your convenience. This reference guide lists a series of products available to you through various stages of a specific challenge or need. These products are broken down into (4) different categories: **Obvious**, **Likely**, **Possible**, and **Enhanced**. Below is a brief description of each of these categories:

Obvious: This piece of equipment will prove to be a need for this specific condition or challenge. This item is often covered by insurance, but is not always the case.

Likely: This piece of equipment probably will be a need depending on severity or progression of condition or challenge.

Possible: This piece of equipment will be needed by some during the progression stage.

Enhanced: This item helps to facilitate an increased quality of life for day-to-day functions. These items are typically not covered by insurance however, we have taken that into consideration with regard to price and options to ensure we address your specific challenge or need.
